Independent Model Validation Report

Model: calibrated LightGBM PD · 2026-07-07

ALL CHECKS PASSED

Check	Result	Status
Leakage	No post-origination fields in the feature set.	PASS
Gini	Gini 0.426 on the holdout (AUC 0.713).	PASS
Ks	KS separation 0.308.	PASS
Calibration	Expected calibration error 0.009 (Brier 0.144).	PASS
Psi	Score PSI train->holdout 0.000. (Out-of-time PSI needs issue_d ...	PASS
Monotonicity	Spearman(score band, default rate) = -1.000 (want strongly nega...	PASS
Challenger	Champion Gini 0.426 vs logistic challenger 0.419 (delta +0.007).	PASS

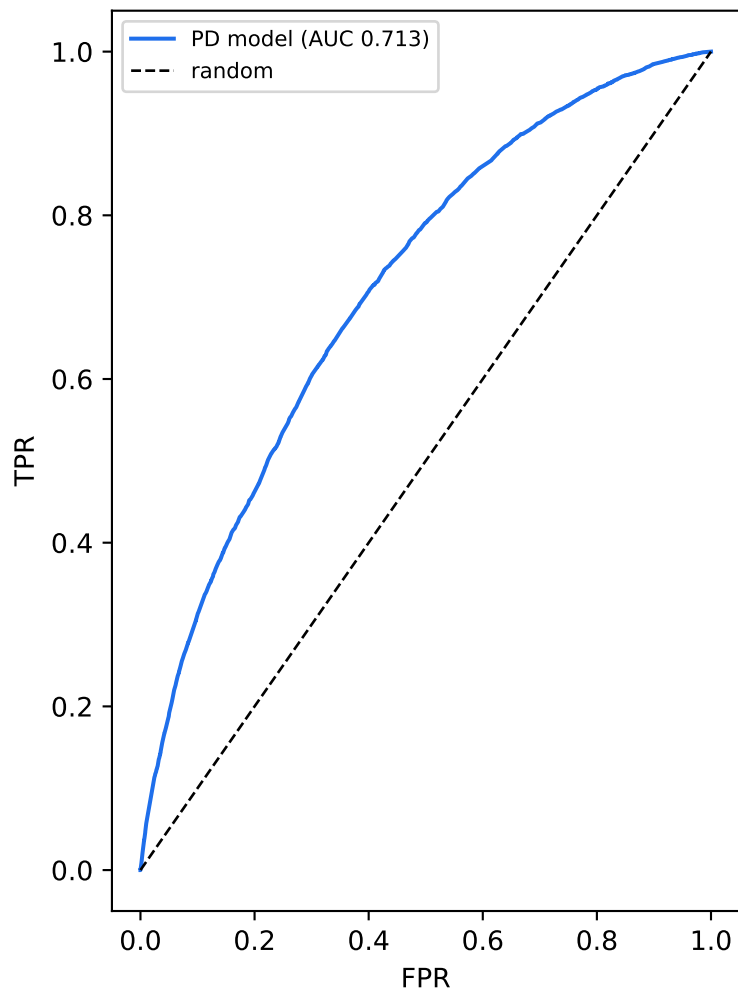

Portfolio snapshot (holdout)

Holdout loans	29,765
Observed default rate	19.8%
Average PD	19.9%
Average LGD (portfolio)	62.2%
Expected Loss rate	13.3%

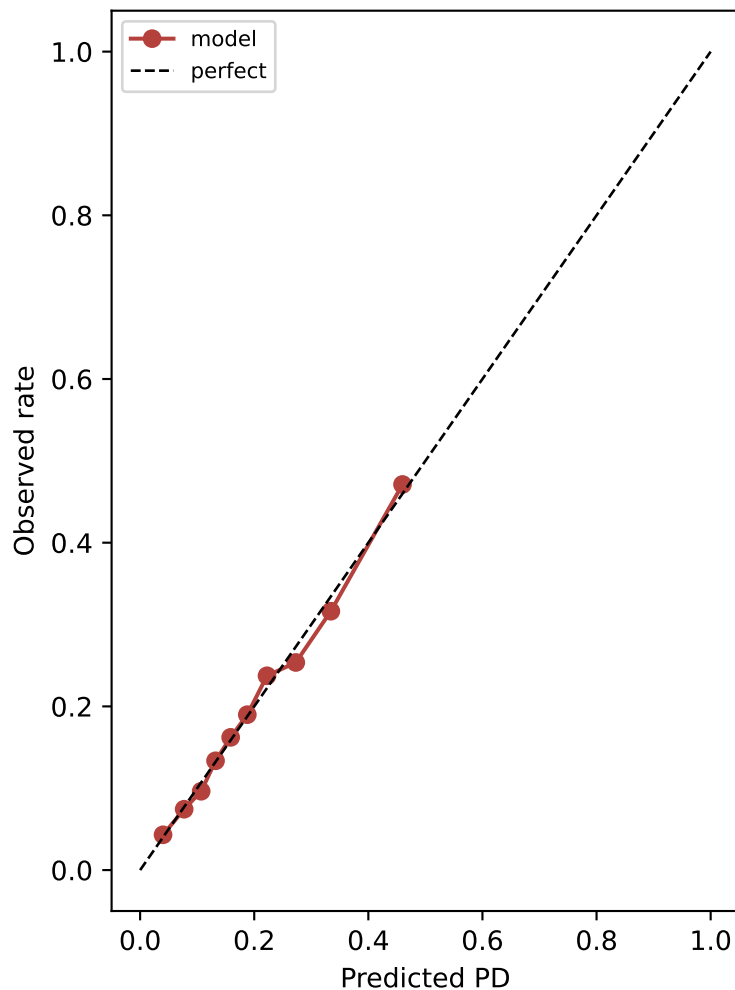

Acceptance thresholds are explicit and tunable in validation/config.py. A failing check is a documented finding, not an error. Numbers regenerate deterministically from the saved model + fixed-seed holdout.
